

CITY OF MOAB ORDINANCE NO. 2026-XX

AN ORDINANCE OF CITY OF MOAB ENACTING CHAPTER 12.32 OF THE MOAB MUNICIPAL CODE, COMPLETE STREETS POLICY

WHEREAS, The City of Moab recognizes that transportation infrastructure should safely and comfortably serve all users including pedestrians, bicyclists, transit users, and motorists; and

WHEREAS, the 2022 Moab and Grand County Unified Transportation Plan recommends adopting a Complete Streets Policy to guide future transportation investments and improve safety and connectivity for all users; and

WHEREAS, through the 2022 Unified Transportation Plan, the City of Moab and Grand County established a Vision Zero commitment with the goal of eliminating all transportation-related fatalities and serious injuries by 2028; and

WHEREAS, transportation networks that safely accommodate all users can reduce crashes, injuries, and fatalities while improving access for residents and visitors of all ages and abilities; and

WHEREAS, the City of Moab and Grand County were awarded a Safe Streets and Roads for All (SS4A) grant in 2025 through the Federal Highway Administration to identify strategies that improve transportation safety for all roadway users, including development of a Complete Streets Ordinance; and

WHEREAS, Complete Streets is an approach to planning, designing, constructing, operating, and maintaining streets to safely and comfortably serve all users, while recognizing that different streets serve different functions and contexts; and

WHEREAS, Complete Streets principles are intended to be applied in a context-sensitive manner that considers roadway function, surrounding land use, community priorities, environmental conditions, and available funding; and

WHEREAS, adoption of a Complete Streets Policy will provide clear direction for future transportation planning, design, construction, maintenance, and capital investment decisions in Moab.

NOW, THEREFORE, BE IT ORDAINED BY THE LEGISLATIVE BODY OF CITY OF MOAB AS FOLLOWS:

Section 1. Enactment. Moab Municipal Code, Chapter 12.32 Complete Streets Policy, is hereby enacted.

Section 2. Effective Date. The Complete Streets Policy shall take effect immediately upon the date of its first publication.

Chapter 12.32

COMPLETE STREETS POLICY

12.32.010 Purpose

This chapter establishes a Complete Streets Policy for public and private transportation projects within the City. Transportation facilities subject to this Chapter shall be planned, designed, constructed, and maintained in accordance with Complete Streets design standards intended to safely accommodate all users, including pedestrians, bicyclists, transit users, and motorists.

12.32.020 Complete Streets Working Group

A Complete Streets Working Group is hereby established to coordinate implementation of this Chapter, evaluate project applicability, review and approve exceptions, and determine required Complete Streets elements where interpretation is necessary.

The Complete Streets Working Group shall consist of the following members, or their designees:

- Community Development Director
- Public Works Director
- Parks, Recreation and Trails Director
- City Engineer
- Administration

Additional staff, agency representatives, consultants, or other stakeholders may participate in Working Group discussions or activities as needed to support implementation of this Chapter.

12.32.030 Applicability

Transportation projects within the public right-of-way, including public and private projects, shall provide the applicable level of Complete Street improvements identified in Table 12.32.030.

For purposes of this Chapter, the following terms shall apply:

- *“Restoration only”* means replacement of existing facilities in the same configuration without requiring additional improvements.
- *“Right-of-way dedication”* means preservation of sufficient right-of-way to accommodate future improvements without requiring immediate construction.
- *“Roadway improvements”* mean improvements within roadway curb lines such as bike lane striping, vehicle lane narrowing or reconfiguration, crossing upgrades, traffic calming, and signal timing.
- *“Frontage improvements”* mean improvements outside roadway curb lines such as curb and gutter, sidewalks, paths, curb ramps, signage, landscaping, lighting, and transit infrastructure.

Table 12.32.030: Complete Streets Applicability		
	Project Scale	
Project Type	Less than 50% of block length or 250 linear ft	Greater than or equal to 50% of block length or 250 linear ft
Spot maintenance or emergency repairs	Restoration only	N/A
Resurfacing, restriping, or other minor roadway projects not involving curb and gutter reconstruction	Restoration only	Roadway improvements
Construction, reconstruction, or other major roadway projects involving curb and gutter reconstruction	Right-of-way dedication and frontage improvements	Roadway improvements and frontage improvements
Parcel development or redevelopment projects	Right-of-way dedication	Frontage improvements

12.32.040 Complete Streets Design Standards

The Complete Streets Design Manual is adopted by reference and made part of this Chapter.

Transportation facilities shall include Complete Streets elements in accordance with the Complete Streets Design Manual with consideration for corridor function identified in the Unified Transportation Master Plan, Grand County Non-Motorized Trails Master Plan, or other relevant plan adopted by the City, unless modified through an approved exception pursuant to Section 12.32.050.

Where adopted plans contain conflicting roadway classifications or facility recommendations, the applicable Complete Streets standard shall be determined by the Complete Streets Working Group.

Complete Streets elements include:

- **Baseline elements:** curb and gutter, sidewalks, crossings, landscaping, signage, lighting, traffic calming, and transit infrastructure.
- **Bike corridors:** baseline elements plus appropriate bicycle facilities and related amenities.
- **Trail corridors:** baseline elements plus separated shared use path and related amenities.

12.32.050 Exceptions

Exceptions to this Chapter may be considered and approved by the Complete Streets Working Group when one or more of the following conditions are met:

- A particular transportation mode is prohibited by law from using a facility, such as non-motorized users prohibited from using an interstate freeway.

- Physical constraints such as right-of-way limitations, topography, utilities, drainage, environmental conditions, or existing structures prevent implementation of the applicable Complete Streets standard.
- An existing or planned transportation facility provides equivalent multimodal access within the corridor.

Approved exceptions may modify the type, width, location, or extent of required Complete Streets elements. Removal of a required Complete Streets element shall be permitted only where modification is not sufficient to address the applicable exception condition.

Approved exceptions shall include written findings documenting the basis for the exception and any modified Complete Streets requirements applicable to the project.
